Utah has been awarded the gold medal for the best collective exhibit of minerals at the Lewis and Clark centannial exhibition at Portland. This is the information that reached Governor J. C. Cutier in a message from Manager Spencer Clawson. The newscame as an agreeable surprise, as a number of other western states, notably Colorade and Idahe, had put forth special efforts to take the lead in this special department. Colorado exhibited the metal wealth of that state in calcorate cabinets that made the Utah exhibit look manufactive to the idles passer-by. The judges have evidently looked beneath the surface and judged the exhibits on their intrinsic merits.

### DRUNKENNESS DECREASING.

People Become More Temperate as Necessity Becomes More Urgent.

Dalrymple, the Glasgow street rail way expert, in speaking of his recent visit to this country, "mentions," say: one paper, "the absence of drunken men from the streets of Chicago as something that attracted his attention and roused his admiration throughout

his stay here."

Gther travelers have also noted and commented upon this temperance in American working men as contrasted with the people of northern European countries. The correctness of their observations seems to be indicated by the statistics compiled regarding the consumption of intoxicating drinks.
